## AGENDA

---

13:30 - 15:30

### WORKSHOPS

*Facilitated, interactive discussions on key issues facing open, smart cities*

#### 1. Advocates as Changemakers: Roles for Advocates in Open, Smart Cities

*Reflecting on the changing power dynamics between advocates and the governments they work with, whether they're building capacity inside gov't, advocating for governance reform, or providing a platform for citizens' voices to be heard in local decision-making. How have advocates played a role in making cities more open and how will they help make cities smarter?*

*Katya Abazajian, Sunlight Foundation*

*Daniel Carranza, Data.UY*

*Ana Gabriel Zúñiga, Hivos*

#### 2. Open Contracting in Cities: Using Open Procurement Data to Deliver Results

*Open contracting can change how procurement delivers value for cities. The session will introduce open contracting experiences from different cities and then break into small discussion groups to advance issues, such as increasing internal efficiencies or market opportunities and supporting the use of open contracting data by business and city communities.*

*Kathrin Frauscher, Open Contracting Partnership*

*Fernanda Hopenhyam, Poder*

*Nicolas Penagos, Open Contracting Partnership*

*Oscar Hernandez, Harvard Government Performance Lab*

#### 3. From Theory to Impact: Designing Open Data Programs to Solve City Problems

*The last decade of open data initiatives has been focused on supplying and publishing data, but cities now face the challenge of making open data meaningful and useful to people working to solve problems in their communities. During our session, we will spark a conversation about the growing frontier of demand-driven open data initiatives.*

*Marielle Velander, Reboot*

*Richard Gevers, Open Data Durban*

*Rosalía Fucello, City of San Isidro*

*Samhir Vasdev, IREX*

*Zack Brisson, Reboot*

#### 4. Open Cities for Climate Change Resilience

*Climate change is a cross cutting issue. This session intends to explore real-world examples of how open data can support cities' climate change mitigation and adaptation efforts, including open data standards and tools, open climate change monitoring and evaluation processes and metrics. This interactive session will also explore how stronger city-to-city networks can help identify, share and scale best practices.*

*Peck Sangiambut, Open North*

*Daniely Votto, World Resources Institute (WRI) Brazil*

*Grace Doherty, World Bank*

*Juan Jose Mendez, City of Buenos Aires*
